I checked this one 3 times to make sure I was seeing this right. The ██████ invoice had this item alone on it. It must have been a hot shot. This salesman assumed that the Chef would not notice the price and he was right. No one caught it. Do you have time to check EVERY SINGLE item? Unless you are a huge operation with a full-time person ordering and receiving, no one has time. A \$142.36 over charge ouch.
